SUMIT SINGH JADAUN

Go / Python Lead Engineer | Cloud-Native Services & Infrastructure Automation

+91 8073420319 | sumitsinghjadaun@gmail.com | Bangalore, India | Open to roles across India

PROFESSIONAL SUMMARY

Software engineering professional with 13+ years of experience spanning backend services, Python automation, and converged/hyperconverged infrastructure. Principal Software Engineer experience at Dell Technologies, with contributions to microservice design and leadership of a six-engineer Python development team. Hands-on work with Go microservices, Kubernetes, Temporal, Kafka, REST APIs, and gRPC.

TECHNICAL SKILLS

Languages: Go (Golang), Python | Backend: Microservices, REST APIs, gRPC, Protocol Buffers, OpenAPI, Temporal | Platform: Kubernetes, Helm, Docker, Linux, Git | Messaging & Security: Apache Kafka, SASL authentication, HashiCorp Vault, authorization, audit logging | Automation: Ansible, Python modules | Infrastructure: VMware ESXi, storage, SAN networking

PROFESSIONAL EXPERIENCE

Dell Technologies | Principal / Senior Software Engineer | Oct 2019–May 2026

Led six engineers developing the Atlas Python automation framework; implemented logging and reporting enhancements and completed Python 3.6-to-3.10 and plugin migration.

Built Go services using the Temporal Go SDK to start workflows and handle pause, resume, and cancellation signals; implemented REST interfaces, OpenAPI generation, and gRPC health checks.

Developed authorization APIs and audit-logging middleware with Protocol Buffers and Kafka producers using SASL authentication; implemented retry handling for Kafka and Vault connectivity.

Created Helm charts for Kubernetes deployments across development, staging, and production environments, including services, configuration, secrets, and service accounts.

Contributed more than 60% of the cloud-interface microservice code for the On-Prem Cloud Controller; implemented REST APIs and developed Ansible playbooks and Python modules for infrastructure automation.

HCL Technologies | Technical Lead / Senior Software Engineer | May 2015–Oct 2019

Riverbed client: Led 3–4 engineers developing Python automation for SteelFusion infrastructure; diagnosed automation-code issues across VMware, storage, and networking environments.

Alcatel-Lucent client: Developed Python scripts for RF and modem-board automation, firmware initialization, and result analysis.

Powerwave Technologies R&D India | Engineer II – Software | Jul 2010–May 2013

Developed Python scripts for radio-hardware interface data analysis and automated workflows using LabVIEW.

EDUCATION

M.Tech, Artificial Intelligence and Machine Learning | IIT Madras | Pursuing

B.Tech, Electronics & Communication Engineering | NIT Patna | 2010 | CGPA: 8.73/10
